- When no messages are on the message board, there only exists a textbox to input a new message
- Messages are able to create sub-messages in a tree like order
- When click on reply button, a textbox should appear

- When click the upvote button, the number of votes should increment and the button should be green
- When click the downvote button, the number of votes should decrement and the button should be red
- If for any reason the message is unable to be sent or unable to vote, an alert message should notify the user
- If a user votes, the user should not be allowed to revote
- When a message or a vote is submitted, then the page should not refresh
- Messages should be sorted by the number of votes
